

the general plan as of the date of application by the applicant to the city, county, or city and county. For each 1 percent increase above 10 percent of the percentage of units affordable to moderate-income households, the density bonus shall be increased by 1 percent up to a maximum of 35 percent. All density calculations resulting in fractional units shall be rounded up to the next whole number. The granting of a density bonus shall not be interpreted, in and of itself, to require a general plan amendment, local coastal plan amendment, zoning change, or other discretionary approval. The density bonus shall not be included when determining the number of housing units that is equal to 10 percent of the total. The density bonus shall apply to housing developments consisting of five or more dwelling units.

(h) When an applicant for a tentative subdivision map, parcel map, or other residential development approval donates land to a city, county, or city and county as provided for in this subdivision, the applicant shall be entitled to a 15 percent increase above the otherwise maximum allowable residential density under the applicable zoning ordinance and land use element of the general plan for the entire development. For each 1 percent increase above the minimum 10 percent land donation described in paragraph (2) of this subdivision, the density bonus shall be increased by 1 percent, up to a maximum of 35 percent. This increase shall be in addition to any increase in density mandated by subdivision (b), up to a maximum combined mandated density increase of 35 percent if an applicant seeks both the increase required pursuant to this subdivision and subdivision (b). All density calculations resulting in fractional units shall be rounded up to the next whole number. Nothing in this subdivision shall be construed to enlarge or diminish the authority of a city, county, or city and county to require a developer to donate land as a condition of development. An applicant shall be eligible for the increased density bonus described in this subdivision if all of the following conditions are met:

(1) The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map, or residential development application.

(2) The developable acreage and zoning classification of the land being transferred are sufficient to permit construction of units affordable to very low income households in an amount not less than 10 percent of the number of residential units of the proposed development.

(3) The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units, has the appropriate general plan designation, is appropriately zoned for development as affordable housing, and is or will be served by adequate public facilities and infrastructure. The land shall have appropriate zoning and development standards to make the development of the affordable units feasible. No later than the date of approval of the final subdivision map, parcel map, or of the residential development, the transferred land shall have all of the permits and approvals, other than building permits, necessary for the development of the very low income housing units on the transferred land, except that the local government may subject the proposed development to subsequent design review to the extent authorized by subdivision (i) of Section 65583.2 if the design is not reviewed by the local government prior to the time of transfer.

(4) The transferred land and the affordable units shall be subject to a deed restriction ensuring continued affordability of the units consistent with paragraphs (1) and (2) of subdivision (c), which shall be recorded on the property at the time of dedication.
