1.0 Introduction and Project Description

1.1 Project Site and Surrounding Area

The Carson Lofts Specific Plan is the regulatory (zoning) document to allow a residential development at 21240 and 21250 South Main Street in the City of Carson, California (“Site”). Upon full implementation of the Specific Plan, the 0.52-acre site will be developed with a 19-unit residential development (“Project”). This Site is located on the northeast corner of Main Street and 213th Street and includes two parcels, Lot A at 21250 South Main Street (APN: 7334-002-007) and Lot B at 21240 South Main Street (APN: 7334-002-008).

Figure 1: Vicinity Map

Figure 3: Existing General Plan Designation

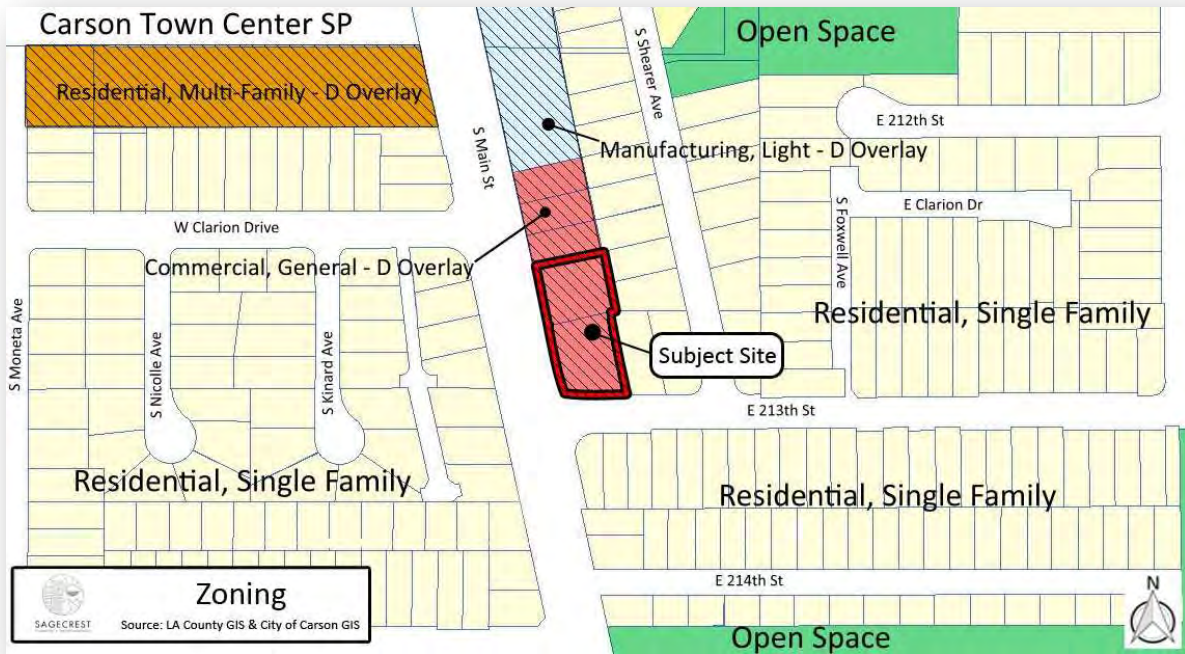

Figure 4: Existing Zoning Designation

Adjacent zoning to the north of the site is Commercial General, Design Overlay (CG-D) and the properties are improved with a paint and body shop and other industrial uses. To the east, south and west are Residential, Single Family (RS) zoned properties, which are improved with single-family homes. Across

Main Street, to the north, is the recently completed Carson Arts Colony residential development, which is zoned Residential, Multiple Dwelling (RM-25).

Figure 8: View of Site Looking North

2.0 Purpose and Intent of Specific Plan

2.1 What is a Specific Plan?

A specific plan is a regulatory tool that local governments use to implement the general plan and to guide development in a localized area. While the general plan is the city's overall guide for growth and development and the zoning code is the tool for regulating development in the entire city, a specific plan is a detailed plan for the development of a particular site or area. Specific plans provide more specificity for the types of uses to be permitted, development standards (setbacks, heights, landscape, architecture, etc.), and circulation and infrastructure improvements within identified subareas of the city. Specific plans can provide flexibility in development standards beyond those contained in the zoning code in order to achieve a customized development pattern. A specific plan should encourage desired patterns of activity, land uses and development types, and remove constraints to efficient development. A specific plan also sets forth strategies for improvements in the specific plan area, including circulation, parking, and streetscape improvements.

2.2 Authority and Scope of a Specific Plan?

California Government Code, Title 7, Division 1, Chapter 3, Article 8, Sections 65450 through 65457 (Specific Plans) grants authority to cities to adopt specific plans for purposes of implementing the goals and policies of the general plan. The Planning Commission must hold at least one public hearing before the planning agency can recommend the adoption of a specific plan.

As expressed in California law, specific plans may be adopted either by ordinance or by resolution. This allows jurisdictions to choose whether their specific plans will be policy driven (adopted by resolution) or regulatory in nature (adopted by ordinance).

As set forth in the Government Code, Section 65451, a specific plan must contain the following information:

- A description of the general distribution, location, and extent of the uses of land within the area covered by the plan.
- The proposed distribution, location, extent, and intensity of major components of public and private transportation, sewage, water, drainage, solid waste disposal, energy and other essential facilities proposed to be located within the area covered by the Specific Plan and needed to support the land uses described in the plan.
- Standards and criteria by which development will proceed and standards for the conservation, development, and utilization of natural resources, where applicable.
- A program of implementation measures, including regulations, programs, public works projects and financing measures necessary to carry out the above information.

2.3 Purpose of the Carson Lofts Specific Plan

The Carson Lofts Specific Plan (Specific Plan) is a regulatory document, adopted by ordinance by the City of Carson (City), and serves as the adopted zoning for the properties located at 21250 South Main Street

(APN: 7334-002-007) and 21240 South Main Street (APN: 7334-002-008). The City has utilized specific plans as tools to achieve the customized development of individual parcels within a broader land use context. The Specific Plan is intended to provide for the classification and development of the site in a coordinated, comprehensive project that will result in a more desirable development or physical environment than would be possible through the strict application of conventional zoning regulations and standards. This includes:

1. Urban Design Framework

Provide development and form-based design standards to promote compatibility and opportunity within the surrounding area.

2. Building Height & Density

Allow additional height and density for a project that will provide housing and more residential opportunities for the area.

3. Pedestrian Network

Establish the Site as a walkable community to residents that will benefit from the area.

4. Design Standards

Encourage design excellence and establish a high-quality standard for future development to occur along Main Street.

5. Residential Density

Fulfill Carson General Plan Policy LU-8.3 by “locating higher density residential uses in proximity to commercial centers” to “encourage pedestrian traffic and provide a consumer base for commercial uses.” (See General Plan Land Use Element, p. LU-30).

6. Site Circulation

Enhance Main Street’s pedestrian, bicycle, and transit-oriented characteristics while at the same time improving vehicular circulation.

7. Effective Residential Development

Promote the development of multi-family housing in close proximity to employment, transportation and activity centers as called for by Housing Element Policies 3.6 and 3.7.

8. Sustainable Communities

Require excellence in multi-family housing design consistent with Housing Element Policy 2.7 “through use of materials and colors, building treatments, landscaping, open space, parking, environmentally sensitive and sustainable building design.

3.0 Relationship to Other Land Use Regulations

The Carson General Plan is a “blueprint” that documents the City's vision for the future and provides goals, policies, and implementation measures that can be utilized by City staff and decision makers to proactively

influence physical growth and change in a manner consistent with this vision. The General Plan provides the City with a multi-disciplinary strategy for achieving the vision in the context of the land use, circulation & mobility, housing, open space, conservation, public safety, noise, cultural resources & historic preservation, growth management, economic development, infrastructure, and urban design elements.

A Specific Plan is a regulatory tool to guide development in a local area consistent with the City's General Plan. While the General Plan provides the primary guide for growth and development citywide, the Specific Plan customizes the planning process to enhance and promote the unique characteristics of a special area. The Specific Plan is adopted pursuant to Section 65450 et. Seq. of the California Government Code.

3.1 General Plan Consistency

To ensure consistency between the Carson Lofts Specific Plan and the City of Carson's General Plan, the General Plan has been amended concurrent with the adoption of this Plan. The corresponding General Plan amendment establishes an "Urban Residential" Land Use Designation for the Carson Lofts Specific Plan area to replace the Site's existing "General Commercial" General Plan land use designation.

The Specific Plan is consistent with the following General Plan Land Use Element goals, policies, and objectives:

A Balance of Uses-

Goal LU-6: A sustainable balance of residential and non-residential development and a balance of traffic circulation throughout the City.

Consistent: This residential development will contribute to the variety of housing for the area by increasing the options of residential units. As stated in Implementation Measure LU-IM-6.4 to "promote a variety of housing types and affordability to meets the development goals of the Housing Element and provide needed housing opportunities to support employment growth (Implements LU-6.1, 6.2 and 6.5)".

Incompatible Land Uses-

Goal LU-7: Adjacent land uses that are compatible with one another.

Consistent: The Specific Plan will allow development of an underutilized property to contribute to the City's growth. Adjacent land uses include single-family residential, which is compatible with multi-family development.

Property Enhancement-

Goal LU-9: Eliminate all evidence of property deterioration throughout Carson.

Consistent: The specific plan would promote the development of the vacant underutilized property with a new multi-family development. This will work towards the goal of eliminating evidence of property deterioration in the City.

City Image-

Goal LU-12: Create a visually attractive appearance throughout Carson.

Consistent: To create a visually attractive appearance, the Specific Plan includes design guidelines that will guide the appearance of the project. This includes architectural style and landscape requirements that will result in an aesthetically pleasing project that will enhance the streetscape.

Livable Communities-

Goal LU-15: Promote development in Carson which reflects the “Livable Communities” concepts.

Consistent: The Specific Plan will facilitate the development of 19 dwelling units on the Site. This will contribute to the diversity of housing types that enable citizens from a wide range of economic levels and age groups to live in Carson.

3.2 Zoning Ordinance Consistency

The Carson Zoning Code and Map is also amended by ordinance concurrent with adoption of the Specific Plan to ensure complete consistency. A “Carson Lofts Specific Plan” zone replaced the Site’s existing “Commercial General with Design Overlay” (CG-D) zoning. Where Carson zoning regulations and/or development standards are inconsistent with this Specific Plan, the Specific Plan standards and regulations shall prevail. However, any issue not specifically addressed in the Specific Plan shall be subject to the general Planning and Zoning Code regulations. A project that requires no deviations from the regulations and/or development standards contained herein shall be exempt from Site Plan and Design Review.

4.0 Land Use and Development Regulations

4.1 Purpose and Intent

This section sets forth the standards for development within the Specific Plan Area. Application of these regulations is specifically intended to provide the most appropriate use of the land, create a harmonious relationship among nearby land uses, and protect the health, safety, and welfare of the community. This Specific Plan shall be used in conjunction with all other relevant City of Carson adopted plans and ordinances.

4.2 General Provisions

4.2.1 Applicability

The Carson Lofts Specific Plan shall constitute the legal zoning for the project site. No construction, modification, addition, placement or installation of any building or structure shall occur, nor shall any new use commence on any lot, on or after the effective date of this Specific Plan, except in conformity with the provisions of this Specific Plan. Actions deemed to be consistent with the Specific Plan shall be determined to be consistent with the City of Carson General Plan, as mandated in California Government Code Section 65454.

The Specific Plan does not convey any rights not otherwise granted under the provisions and procedures contained in the Zoning Code and other applicable ordinances, except as specifically provided herein. Any issue not specifically covered in the Specific Plan shall be subject to the Zoning Code and/or Carson Municipal Code (CMC), or to interpretation by the Community Development Director if not specifically covered in the City's regulations.

In cases where development regulations and standards set forth in this Specific Plan are inconsistent with the Zoning Code, the Specific Plan shall prevail. The provisions of this Specific Plan shall also prevail where there are inconsistencies between this Specific Plan and other City ordinances, rules, and regulations. Exceptions, deviations, and any future development that is not in conformance with standards and guidelines contained in the Specific Plan shall be subject to Site Plan and Design Review in accordance with Carson Municipal Code Section 9172.23.

4.2.2 Procedures.

Procedures, including legislative, administrative, and quasi-judicial procedures, for implementing this Specific Plan, shall be as set forth in CMC Article IX, Part 7.

4.2.3 Severability

In the event that any regulation, condition, program, portion or policy of this Specific Plan or the application thereof to any person or circumstance is held to be invalid or unconstitutional by any court of competent jurisdiction, such portions shall be deemed separate, distinct, and independent provisions and shall not affect the validity of the remaining provisions of this Specific Plan or applications thereof which can be implemented without the invalid provision or application.

4.2.4 Interpretation

The Community Development Director shall resolve any ambiguities related to the implementation of the provisions of this Specific Plan. Such interpretations shall take into account the stated goals and intent of the Specific Plan. Any interpretation made by the Community Development Director may be appealed to the Planning Commission. The decision of the Planning Commission shall be final unless appealed to the City Council.

4.2.5 Definitions

For the purpose of this Specific Plan, certain words and terms are defined in this section. Unless otherwise specified herein, terms used in this document shall have the same definitions provided in the Zoning Code (CMC Article IX).

Building Height shall mean any vertical distance from the average finished grade to the highest point of the coping of a flat roof, to the deck line of a mansard roof or to the average height of the highest gable of a pitch or hip roof.

Floor Area, Gross shall mean the sum of the horizontal areas of all floors within a building measured from the exterior faces of exterior walls or from the centerline of party walls separating two (2) buildings. The floor area of any basement, cellar or attic with headroom of more than six and one-half (6-1/2) feet shall be included. A basement, cellar or attic floor space with six and one-half (6-1/2) feet

of headroom or less, as well as the area of courtyards, shall be excluded. For the purpose of computing required parking area, floor area devoted to parking and maneuvering shall not be included.

Floor Area Ratio (FAR) shall mean the gross floor area minus the area of permanent walls, elevator shafts, stairwells, housings for mechanical equipment and vent shafts.

Lot Area shall mean the total extent of surface, measured in a horizontal plane, within the lot lines of a lot, and shall mean net lot area unless otherwise indicated.

Lot Area, Net shall mean that area of a lot exclusive of:

1. Public streets, alleys, walkways and other existing public rights-of-way.
2. Proposed public rights-of-way such as alleys and streets and other necessary public sites, when approved for inclusion within a proposed development project.
3. Other public or private easements where the owner of land that is subject to an easement does not have the right to use the entire surface of land in any manner.

Open Space shall mean ground areas other than the following:

1. Public rights-of-way.
2. Driveways.
3. Trash areas.
4. Parking areas.
5. Loading areas.
6. Vehicle maneuvering areas.
7. Ground area covered by building or structures other than permitted encroachments.

Open Space, Private shall mean open space which has an average gradient of not more than five (5) percent. Private open space may include but is not limited to balconies, patios, terraces, and roof gardens and, in all cases, shall be contiguous to individual dwelling units. Front, side, and rear yard setbacks shall not be credited toward private open space.

Open Space, Usable shall mean open space which has an average gradient of not more than five (5) percent. Usable open space may include, but is not limited to, balconies, terraces, and roof gardens. Children's playgrounds, private open space and/or side and rear yard setbacks may be credited toward usable open space.

Setback shall mean the shortest horizontal distance, measured at ground level and above, between a building or structure and a lot line or other specified line.

4.3 Land Use/Establishment of Zoning

4.3.1 Permitted Uses

The following uses shall be permitted in the Carson Lofts Specific Plan:

Table 1: Permitted Uses Table

Legend		
P	Permitted Use	
D	Uses permitted subject to the approval of the Community Development Director	
Use		Note
Multiple-Family Dwellings	P	
Residential Condominium	P	
Home Occupations	P	Per CMC 9122.4 and 9128.4
Child Day Care	P	Per California Health and Safety Code, Division 2, Chapter 3.6
Contractor’s office and/or storage of construction materials and equipment during construction	D	
Real estate tract office, limited to the sale of property on the site where such office is located	D	

4.4 Development Standards

4.4.1 Residential Density

The maximum residential density is 40 units per acre. Any fractional amount equal to or greater than one-half (0.5) shall permit an additional dwelling unit.

4.4.2 Floor Area Ratio (FAR)

The FAR limitation in this Specific Plan shall be used to limit the above-grade gross floor area of all permitted structures to an FAR 1.0.

4.4.3 Building Height

No structure within the Specific Plan area shall exceed 39 feet in height. There shall be a limit of three-stories within the height limit.

4.4.4 Front, Side and Rear Setbacks

All properties within the Specific Plan shall maintain the following minimum setbacks:

Front: 5 feet

- Street Side: 5 feet
- Side: 10 feet
- Rear: 10 feet

Setbacks shall be open ground to sky, except for architectural features, balconies, porches, and stoops, which shall be subject to Community Development Director approval.

4.4.5 Landscape

Landscaping is an important element that contributes to the identity of the site and enhances the architectural theme of the buildings. All areas of the site that are not occupied by a building, walkway, driveway, parking, or private open space shall be landscaped. A variety of trees, shrubs, and ground covers shall be utilized; however, consideration of water conservation shall take precedent in selection of landscape material. All landscaping and irrigation shall comply with State of California’s Model Water Efficient Landscape Ordinance. Special emphasis of using trees along the eastern property line is encouraged to screen the project from the adjoining neighbors and the public rights-of-way (including 213th Street).

Figure 10: Conceptual Plant Legend

4.4.6 Usable Open Space

A project within the Specific Plan area shall provide a minimum, total open space area (common, useable, and private open space) of at least 20 percent of the net project area for projects of one (1) acre or less. The subject property consists of two parcels totaling .52 acres (22,597 square feet), as such total open space shall be 4,519.4 square feet minimum.

Common Open Spaces: Common open space may include landscape areas and walking paths. Common open space areas are typically found at the ground level.

Useable Open Spaces: Useable open space may include playgrounds, picnic/barbeque areas, swimming pools, sports courts, gardens, and/or the like. Useable open spaces should be located above the first floor and within a courtyard that can be easily viewed from most of the dwelling units. Useable open space shall be at least 30% of the total required open space, as such usable open space shall be 1,355.8 square feet minimum.

Private Open Spaces: No more than 35 percent of the required open space may be provided through private balconies, terraces, and stoops for individual units only accessible by the unit’s tenant. In any case, private balconies shall be 60 square feet minimum.

Table 2: Private Open Space Size

Figure 11: Open Space

4.4.7 Fences and Walls

A fence, wall, or hedge shall not exceed a height of six (6) feet above the finished grade at each point along the fence, wall, or hedge. Where there is a difference between the grade on either side of the fence, wall, or hedge, the higher grade shall be used.

A fence, wall, or hedge that is located between the street and any building shall not exceed a height of forty-two (42) inches above finished grade at each point along the fence, wall, or hedge.

The height limitation of this Section shall not apply in any case where it is in conflict with any other City ordinance or State law or regulation.

4.4.8 Signage

Unless specifically addressed below, signage within the Specific Plan area shall be governed by Section 9126.7 of the CMC.

- a. Project Identification Sign: One sign which identifies the project (e.g., “Carson Lofts”) shall be permitted per street frontage. Each sign shall be non-illuminated or reverse channel letters, wall mounted, and shall not exceed twenty-four (24) square feet.
- b. Address Signs: One address sign (street number only) shall be allowed per building. Address signs shall be mounted facing the street in which the property is addressed and shall comply with all requirements of the Building and Fire Codes.

Figure 12: Typical Sign Example

4.4.9 Parking

The required number of off-street automobile spaces shall not be less than 2 covered spaces for each unit, plus 1 guest space for every 5 units. Parking space shall be a minimum of 9’ wide by 19’ deep. Drive aisles shall be extended a minimum of 3’ beyond the last parking space.

Every parcel within the Specific Plan shall record a reciprocal access and parking agreement with the other parcels in the Specific Plan. Said reciprocal access and parking agreement shall be submitted to the City for review and approve before being recorded and prior to granting of occupancy for building. The use of landscaping and/or walls should be used to minimize the appearance of vehicles from the public right-of-way.

In addition to vehicle parking, short-term bicycle parking shall be provided at the increment of one bicycle space for every four units. Bicycle parking shall comply with the following:

- a. All bicycle parking facilities shall be dedicated for the exclusive use of bicycle parking.
- b. All bicycle parking spaces shall permit the locking of the bicycle frame and one wheel with a U-type lock, support the bicycle in a stable position without damage to wheels, frame, or components.
- c. Bicycle parking facilities shall be securely anchored so they cannot be easily removed and shall be of sufficient strength and design to resist vandalism and theft.

4.5 Reciprocal Easement Agreement (REA)

- A REA for reciprocal access, parking, utilities, and waste disposal shall be recorded against both properties (APN 7334-002-007 and APN 7334-002-007) prior to the issuance of building permits.
- The City of Carson shall review and approve the REA prior to recordation.
- The REA shall take effect immediately upon recordation.
- The City of Carson shall be a named third-party beneficiary of the REA. The REA shall not be amended or terminated without prior written consent from the City of Carson.

5.0 Design Guidelines

The Specific Plan Design Guidelines are intended to create clear and predictable design and development of the site. They are not specific development regulations, but rather guidance on the appearance of the site and architectural design.

Figure 13: Design Example

Figure 14: Design Example

- Site Design – Sites shall be designed to focus the buildings toward the street, while maintaining private amenities focused on private courtyards. This is achieved by incorporating the following:
 - Dwelling units should be provided on the ground floor adjacent to Main Street.
 - Parking should be at the ground level tucked behind the residential dwelling units.
 - The number of driveways should be limited to one per street frontage. Shared driveways between multiple properties are encouraged.
 - Common open space should be provided in central courtyards, not visible from the streets.
 - Access to dwelling units on the ground level should be through a private patio.
 - Access to dwelling units above the ground level should be through a central lobby.

- Architectural Design – Architectural design should be consistent throughout all buildings in the Specific Plan area. The following design elements should be incorporated:
 - Multiple finish materials, colors, and textures should be incorporated. The architectural finishes can include, but are not limited to, fiber cement composite panels, porcelain tiles, and stucco. The use of wrought iron railing on balconies and anodized aluminum mullions with glazing on lobbies is encouraged.
 - No horizontal surface should be greater than 40 feet without providing articulation in the façade.
 - Multiple roof planes and ridge lines should be used. For flat roofs, this could include providing variable height parapets.
 - Roof mounted equipment should not exceed the height of the parapet, unless screening is provided, and equipment is not visible from the public right-of-way.

- Landscape – Landscaping is a critical component to providing quality design. The following should be incorporated:
 - Landscape design should complement the architectural style.
 - The use of drought tolerant landscaping is encouraged.

- Mature height of trees should provide screening for adjacent single-family homes.
- Landscaping shall be used to screen parking areas that are visible from the public right-of-way.
- Streetscape - The proposed project should enhance the streetscape. This should include:
 - Quality architectural style, including the use of varied materials and building articulation to avoid long, monotonous facades.
 - Low patio walls that do not exceed 48 inches in height. Walls should either be constructed of a decorative block or have a painted flat stucco finish.
 - Landscape should be high quality and be appropriate to blend with the architectural style. The use of turf should be avoided.
 - Above-ground utility equipment should be screened. Appropriate screening may include landscaping, solid walls, painted art feature, or the use of vinyl screening wrap to mimic landscaping. All screening shall be approved by the City Planning division.

Figure 15: Vinyl Screen Wrap of Transformer

6.0 Sustainability Features

The Carson Lofts Specific Plan shall be based on principals of smart growth and environmental sustainability, as evidenced by its residential nature, the site's proximity to the other residential uses, being roughly midway between downtown Los Angeles and South Bay employment hubs, the accessibility of public transit, and the availability of existing infrastructure to service the proposed use.

The Carson Lofts Specific Plan shall incorporate an environmentally sustainable design and green building technologies. It shall utilize more resource-efficient modes of construction and adhere to the principles of energy efficiency, water conservation, environmentally preferable building materials, and overall waste reduction. Sustainability features of the project shall include the following:

6.1 Water Conservation

Water conservation features shall include a range of techniques that enhance site sustainability. Drought-tolerant plants and indigenous species shall be utilized as part of the proposed landscaping program.

- High-efficiency dual flush toilets (maximum 1.28 gallons per flush).
- Residential bathroom faucets with a maximum flow rate of 1.0 gallons per minute, and kitchen faucets with a maximum flow rate of 1.5 gallons per minute. No more than one showerhead per shower stall, with a flow rate no greater than 1.75 gallons per minute.
- High-efficiency clothes washers either within individual units (with water factor of 6.0 or less) and/or in common laundry rooms (commercial washers with water factor of 7.5 or less).
- Individual metering and billing for all residential water use.
- Installation of high-efficiency Energy Star-rated dishwashers in all residential units.
- Weather-based irrigation controller with rain shutoff, matched precipitation (flow) rates for sprinkler heads, and rotating sprinkler nozzles or comparable technology such as drip/microspray/subsurface irrigation and moisture sensors where appropriate.
- Use of proper hydro-zoning, turf minimization, zoned irrigation and use of native/drought-tolerant plant materials.
- Use of reclaimed water for landscape irrigation.
- Landscape and irrigation improvements shall comply with the California Model Water Efficient Landscape Ordinance.

6.2 Energy Conservation and Efficiency

- Energy Star-labeled products and appliances shall be installed where appropriate.

- Title 24, Part 6, California Energy Code baseline standard requirements for energy efficiency, based on the 2013 Energy Efficiency Standards requirements shall be met. Examples of design methods and technologies that shall be implemented may include, but not be limited to, high performance glazing on windows, appropriately oriented shading devices, high efficiency boilers (if single metered), instantaneous water heaters (if individual meters), and enhanced insulation to minimize solar and thermal gain.
- Application of energy-saving technologies and components to reduce the project's electrical usage-profile. Examples of these components include compact fluorescent light bulbs (CFL), energy saving lighting schemes such as occupancy-sensing controls (where applicable), use of light emitting diode (LED) lighting or other energy-efficient lighting technologies where appropriate, and energy-efficient heating and cooling equipment.
- Incorporation of passive energy efficiency strategies, such as inner courtyards.
- To achieve maximum efficiency while maintaining safety for residents and visitors, exterior lighting elements will be controlled by light sensors and/or timeclocks to avoid over lighting, as appropriate.
- Commissioning of building energy systems to verify that the Project's building energy systems are installed, calibrated, and performing to the Specific Plan requirements.

6.3 Transportation

- Provision of on-site parking for visitors and residents shall be provided, including bicycle parking. Parking and access shall be shared among all properties within the Specific Plan through the implementation of reciprocal access and parking agreements.
- Accessibility to multiple public transportation lines are provided to visitors and residents. The Project Site is adjacent to Carson Circuit Route F and the North South Shuttle.

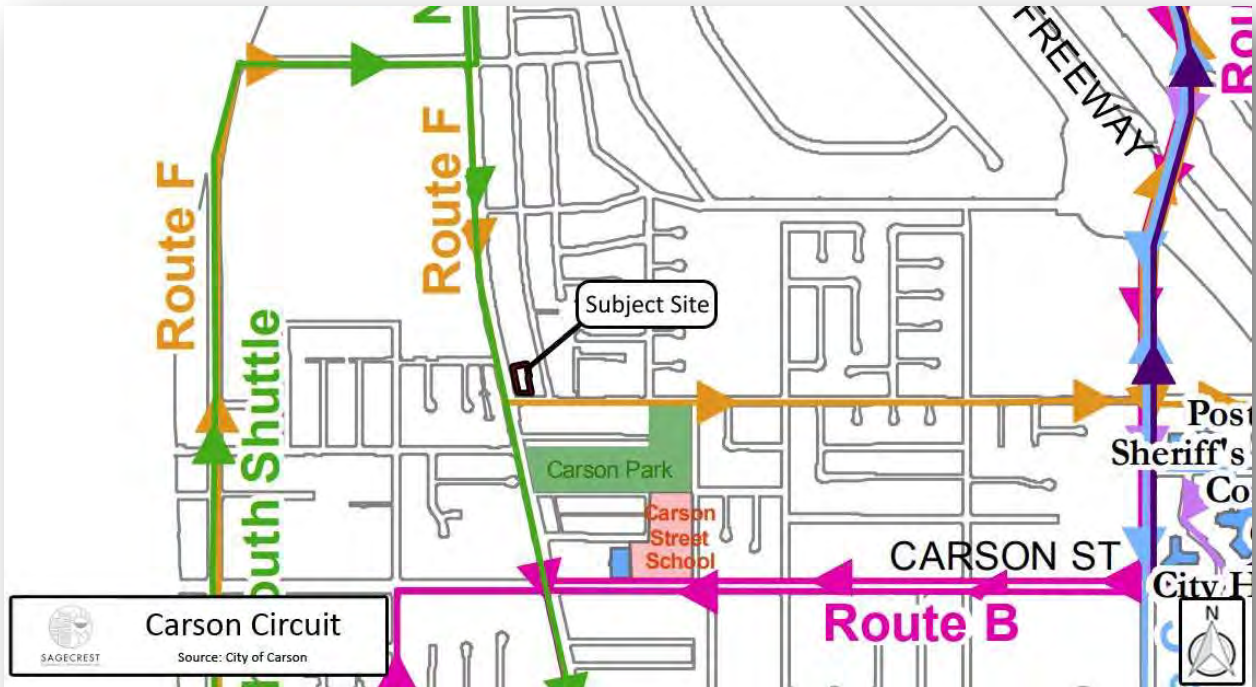

Figure 16: Transit Routes

6.4 Air Quality

- Participation in fundamental refrigerant management to preclude the use of chlorofluorocarbons (CFCs) in HVAC systems.
- Use of adhesives, sealants, paints, finishes, carpet, and other materials that emit low quantities of volatile organic compounds (VOCs) and/or other air quality pollutants.

6.5 Solid Waste

- All construction shall comply with the Construction and Demolition Debris Recycling and Reuse contained in Chapter 20.87 of the Los Angeles County Code. This shall include obtaining approval of a Construction and Demolition Debris Recycling and Reuse Plan prior to obtaining building permits.
- Trash enclosures shall be designed to accommodate a refuse bin, recycling bin, and green waste bin. The size of the bins and frequency of pick-up shall be sufficient to accommodate the solid waste generated on the site.

6.6 Noise Management

- All outdoor mechanical and electrical equipment shall be designed to meet the noise requirements of CMC, Chapter 5. In addition, all outdoor loading dock and trash/recycling areas

shall be fully or partially enclosed such that the line-of-sight between these noise sources (loading dock service area) and any adjacent noise sensitive land use shall be obstructed.

7.0 Infrastructure and Utilities

7.1 Water System

Domestic water for the Specific Plan area is provided by the California Water Service Company. All water service and connection to the distribution system, shall be reviewed and approved by the California Water Service Company.

7.2 Sewer System

The local sanitary sewer system is owned by the Los Angeles County Sanitation District and includes sewer lines in Main Street and 213th Street rights-of-way. All dwelling units shall connect to the sanitary sewer system, which shall be reviewed and approved by the City.

7.3 Drainage System/Low Impact Development

Storm drain mains are located in the Main Street and 213th Street rights-of-way. All storm water shall comply with the Municipal Separate Storm Sewer System (MS4) Discharge within the Coastal Watersheds of Los Angeles County Permit.

7.4 Electricity

Electricity to the site is provided by Southern California Edison (SCE). SCE maintains a 12kv distribution line that runs north and south on the east side of Main Street. The dwelling units shall connect to this distribution system line shall run underground from the nearest pole to the site.

7.5 Natural Gas

Natural gas to the site is provided by Southern California Gas Company. Natural Gas Service shall be provided in a manner that is approved by the Southern California Gas Company.

8.0 Financial Component

The Carson Lofts Specific Plan is comprised of a multi-family residential development project financed through private funds..

Interim Development Impact Fee. In accordance with Article XI (Interim Development Impact Fee Program) of the Carson Municipal Code and the current Fiscal Year 2021-2022 fees (effective through June 30, 2022) the applicant, property owner, and/or successor to whom these project entitlements are assigned (“Developer”) shall be responsible for payment of a one-time development impact fee at the rate of \$15,087.23 per residential unit constructed. The proposed development includes development impact fees estimate of \$286,657.37 (19 units X \$15,087.23 = \$286,657.37). If the Project increases or decreases in unit count, the development impact fee amount will be adjusted accordingly at the same rate.

Final development impact fee amounts are calculated and due prior to issuance of a building permit in one lump sum installment. Fees are subject to adjustments every July 1 based on State of California Construction Cost Index (Prior March to Current March Adjustment). If fees are paid after June 30, 2022, the development impact fee rate will be adjusted accordingly to the current rate at time of payment. No building permits shall be issued prior to the full payment of the required development impact fee.

Funding Mechanism for Ongoing Services / Community Facilities District. The proposed development is required to mitigate its impacts on City services. The City adopted Community Facilities District (CFD No. 2018-01) and may adopt a similar community facilities district in the future to use instead of CFD No. 2018-01 (collectively referred to herein as the “CFD”) to fund the ongoing costs of city services permitted by the CFD, including the maintenance of parks, roadways, and sidewalks and other eligible impacts of the Project within the CFD. A uniformed-standardized city-wide rate was adopted pursuant to Resolution No. 19-009 (“Resolution”) and accompanying Fiscal Impact Analysis (“FIA”) report.

The Developer shall be responsible to establish a funding mechanism to provide an ongoing source of funds for the ongoing services comparable to the uniformed-standardized city-wide rate established in the Resolution and FIA report. Based on the adopted Resolution, the subject property falls under “Residential – All Others” rate at \$1,006.48 per unit per year through June 30, 2022. Based on a 19-unit development, the current estimated annual amount for ongoing services is \$19,123.12, subject to annual adjustments.

Prior to recordation of final tract map or permit issuance, whichever comes first, Developer shall demonstrate compliance under this section either through: 1) Annexing into a City CFD or 2) Establishing a funding mechanism to provide an ongoing source of funds for ongoing services, acceptable to the City.

Appendices

A. Project Plans

RECIPROCAL EASEMENT AGREEMENT (REA)

- A REA for reciprocal access, gathering utilities and waste disposal shall be recorded against both properties (APN 234-002-007 and APN 234-002-011) prior to the issuance of building permits.
- The City of Carson shall review and approve the REA prior to recording.
- The REA shall state that it is immediately upon recording.
- The City of Carson shall be a named third-party beneficiary of the REA. The REA shall not be amended or terminated without prior written consent from the City of Carson.

GENERAL NOTES:

- OWNER TO MAINTAIN LANDSCAPE AND IRRIGATION SYSTEM
- STREET TREES WITHIN THE PUBLIC RIGHT-OF-WAY ARE TO BE PLANTED PER APPROVED STREET IMPROVEMENT PLANS.
- ALL HARDCAPES, RETAINING WALLS, SWIMMING POOLS AND/OR BLOCK WALLS MUST BE REVIEWED AND APPROVED UNDER A SEPARATE PERMIT.
- ALL PLANTS ARE IN COMPLIANCE WITH MODEL WATER EFFICIENT LANDSCAPE ORDNANCE (MWFLO).
- CONTRACTOR TO PROTECT AND PRESERVE IN PLACE ALL EXISTING SURVEY MONUMENTS. ANY MONUMENT DISTURBED SHALL BE RESET BY A LICENSED LAND SURVEYOR AND THE APPROPRIATE CORNER RECORD MUST BE FILED WITH THE COUNTY OF LOS ANGELES.
- TREE CANOPIES ARE SHOWN AT FULL MATURITY.

7. AUDIT SHALL BE IN ACCORDANCE WITH THE LATEST STATE OF CALIFORNIA LANDSCAPE WATER MANAGEMENT PROGRAM AS DESCRIBED IN THE LATEST EDITION OF THE CALIFORNIA WATER RESOURCES AGENCY (CWAR) WATER AUDIT SCHEDULE SHALL BE CONDUCTED AT LEAST ONCE EVERY FIVE YEARS IN ACCORDANCE WITH THE REQUIREMENTS OF TITLE 20, DIVISION 1 OF THE LOS ANGELES COUNTY CODE.

- TOTAL PROPOSED LANDSCAPE AREA 3164 S.F.
- TOTAL TURF AREA = 0 S.F. IS 0% OF TOTAL LANDSCAPE AREA
- TOTAL DROUGHT TOLERANT LANDSCAPING AREA = 3164 S.F. IS 100% OF THE TOTAL PROPOSED LANDSCAPE AREA.
- HYDROZONING IRRIGATION TECHNIQUES SHALL BE INCORPORATED INTO THE LANDSCAPE DESIGN.
- THIS PROJECT REQUIRES A LANDSCAPE PERMIT. PRIOR TO FINAL CERTIFICATION FROM A LICENSED LANDSCAPE ARCHITECT SHALL BE PROVIDED TO THE BUILDING OFFICIAL. FINAL CERTIFICATION CAN BE OBTAINED AT THE FOLLOWING: <http://dpw.lacounty.gov/isd/publications/index.cfm>
